Contribution Rates 2022

At the request of the Board of Trustees of the Guarantee Fund, the Federal Occupational Pensions Regulatory Commission (OAK BV) has approved the following contribution rates for the assessment year 2022:

Contribution rate	Task
0,12%	to provide subsidy payments if the age structure is unfavourable, based on the wage sums coordinated pro rata in compliance with the Occupational Benefits Act
0,005%	to provide insolvency and other payments based on the leaving benefits stipulated by regulation for all insured persons in active employment and for pension benefits from the operating account multiplied by 10

Both contribution rates therefore remain unchanged by comparison with assessment year 2021. Contributions for 2022 will become payable as of 30 June 2023.
